YEARS

TEKMINDZ™

eGovernance is a strategic vertical and a major focus area in TekMindz. With that focus, TekMindz enables governments to transform public service delivery and simplify the lives of citizens through efficient eGovernance. Leveraging on skills and technologies developed over the years, we have taken major initiatives in eGovernance, offering solutions and services cutting through geographical barriers.

Strengthening public service delivery in West Africa

TekMindz has delivered over 20 projects in eGovernance for numerous government ministries and municipalities.

We have leveraged technology to reshape the governance of taxation and internal revenue system, Education and Learning management System, complete national Postal Management System, Immigration services and more, providing cost effective, long term and stable solutions.

Developed an Aggregated Payment Platform with Banks and various eGovernance merchant services in Africa.

99.99%

Uptime for eGovernance Applications

3,200

Postal Branches Integrated

TekMindz, through its eGovernance services, has the efficiency to automate the internal workflow and empower every employee to provide high value service to the citizens.

We have matured as an organization to understand the way various government organizations function, and have been able to suggest improvements in government processes and also automate these processes so that the dream of smart Governance is realized.

TekMindz has successfully demonstrated this in most of its eGovernance projects in public sector across Administration, Utilities and citizen services and more.

Leveraging Technology to help the government build a smarter nation

Innovative technology platforms for the Council of Scientific & Industrial Research (CSIR), Ministry of Science & Technology, Government of India.

37
